Recommendations

ARPU = Average Revenue per User

TAU = Total Active Users

TUsU = Total Unsubscribed Users

Revenue

₹15.9bn -0.5%

Before 5G = ₹16.0bn

ARPU

₹211.3 +11.05%

Before 5G = ₹190.2

TAU

₹77.4M -8.28%

Before 5G = ₹84.4M

TUsU

₹7.0M +23.50%

Before 5G = ₹5.6M

Key Insights

- Customers are spending more on telecom after the 5G launch.
- Higher customer spending helped keep overall revenue stable.
- The company should focus on bringing back active users.
- Increasing user engagement should be the next focus area.

(1GB / Day)

Valid: 28 Days

₹1296M

p12

Ultra Duo Data Pack

(1.8GB / Day Combo)

Valid: 55 days

₹1161M

Key Insights

- Customers prefer long-validity combo plans over short-term packs.
- High data plans generate the highest revenue, reflecting increasing data consumption.
- Rapid customer adoption made p11 and p12 a high-performing new plan, introduced after 5G launch.
- Expanding similar long-validity, high data plans can further boost revenue.

Mini Ultra Saver Pack(750 MB / Day)
Valid: 28 Days**₹315M ↓**

p6

Xstream Mobile Data Pack15 GB Data
Valid: 28 Days**₹495M ↓**

Key Insights

- p7 limited to 3G / 4G, making it less attractive and outdated in the 5G era, therefore it should be discontinued.
- p13 and p6 provides limited data benefits, which leads to failure in attracting significant customer demand.

NEEDS IMMEDIATE ATTENTION

 Delhi & Ahmedabad

City	Revenue Growth	TAU Growth
Delhi	-2.83%	-17.63%
Ahmedabad	-2.02%	-18.93%

Key Insights

- Lucknow improved both revenue and active users, making it the strongest-performing city after the 5G rollout.
- Pune recorded the highest increase in active users but only modest revenue growth, suggesting potential for better monetization.
- Delhi and Ahmedabad require immediate attention, as both revenue and active users declined significantly after the 5G launch.

City Highlights

Recommendations

Improve Customer Retention

Reduce churn through loyalty programs, personalized recharge offers, and proactive win-back campaigns.

Expand Successful 5G plans

Promote long-validity, high-data plans similar to p1, p11, and p12.

Strengthen Weak Markets

Prioritize Delhi, Ahmedabad, Chennai, and Hyderabad with targeted marketing and retention initiatives.

Optimize the Product Portfolio

Retire outdated plans and continuously redesign low-performing plans based on customer demand.

Increase Revenue per User

Leverage rising ARPU by introducing premium 5G bundles, family plans, and value-added services.
